

PRODUCT DESCRIPTION AND APPLICATION

Product Description

Rosneft Kinetic UN 80W-90 is a modern semi-synthetic multigrade transmission oil, specially developed for use in high-loaded transmissions operating at elevated temperatures. A unique latest generation additive package and synthetic base oils provide the highest performance level, improved anti-oxidation properties and extended oil life.

Application

Rosneft Kinetic UN 80W-90 is designed for use in mechanical transmissions and hypoid axles of passenger cars and commercial vehicles working with shock loads at high contact stresses, where improved gear protection and extended service life of the synchronizers are required. Rosneft Kinetic UN oils are universal and fully meet the requirements of API GL-4 and API GL-5 service categories, allowing them to be used in place of API GL-4 transmission oil and API GL-5 hypoid axle oil.

APPROVALS AND SPECIFICATIONS

International specifications:
API GL-4, GL-5

Approvals:
AvtoVAZ

BENEFITS

- Unique technology ensures maximum protection of parts in the most difficult working conditions;
- Synthetic base oils and high-quality additives provide an exceptional thermal-oxidative stability and extended oil drain interval;
- Semi-synthetic oil Rosneft Kinetic UN 80W-90 has improved low-temperature properties, compared to mineral oils of viscosity classes 80W-85 and 80W-90;
- Simultaneous compliance with the requirements of API GL-4 and API GL-5 allows to unify the range of transmission oils.

PACKAGING

1 L, 4 L, 216.5 L
